Claims 1-7 and 10-18 are presented for examination.

The remarks filed on August 11, 2008 have been received and entered.

Claims 1-7 and 10-18 are rejected under 35 U.S.C. 112 first paragraph for failing to comply with the enablement requirement for the reasons set forth on pages 2-4 of the office action of May 15, 2008.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality between the concentrations of chlorine dioxide and the peroxy compounds of Berger et al. and the concentrations and the PH of the claimed composition. The arguments have been noted. Applicant is reminded that the concentrations of chlorine dioxide and peroxy compounds and also the PH of Berger's composition are within the scope of the concentrations used by the instant application. Berger in column 4, lines 20-36 teaches that after some time, there is a yellow brown coloring as a result of proportionately released chlorine dioxide. If the released chlorine dioxide proportion is removed from the aqueous solution, then after a short time the greenish coloring of the clear aqueous solution reappears. This means that in a sense of equilibrium reaction the chlorite solution always reforms chlorine dioxide during the removal thereof. Berger recognizes that the chlorite solution always form chlorine dioxide. Applicant's remarks regarding the differences between the Berger's teachings and the claims of the instant application have been noted. Applicant refers to the differences in PH and the greater proportion of stabilizing peroxy compound per chlorite compound, and as a result great stability. The examiner respectfully disagrees, based on the teachings of Berger, which covers the claimed

range PH and the claimed range concentrations, and the conclusion that chlorite solution always reforms chlorine dioxide.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
